

SUMI'S JOURNEY

User Manual Document | Assignment 2

Game Overview

Sumi's Journey is a browser-based side scrolling platformer. Players guide Sumi, an adventurous cat across three chapters. First Chapter: Beyond the Peaks, Second Chapter: The Quiet Bog, and Chapter Three: Concrete & Shadows. All in search of a snack called Moon Flakes Sumi saw on television. Along the way, hidden clues reveal the truth about what Moon Flakes are really made of, and only the most curious and observant players will uncover the full story.

The game is played entirely in a web browser using a keyboard.

Story

Sumi is an adventurous cat who spots a commercial for Moon Flakes "Only Available in The City". Without hesitation, Sumi gets too excited, runs out and leaves the gate open, forgetting Sumi's backpack and snacks, and heads to the city in search of Moon Flakes.

Traveling through the mountains, Sumi is guided by fellow animals. First the raven on a sign, guides Sumi to the Frog in a rain coat. Then the swamps, where Sumi finds a Willow O'Wisp which then leads to the drone that sneaks Sumi past the city gates. Finally, in the big dark city, Sumi is greeted by the last NPC, the Holo Drone, telling Sumi what they seek is just up ahead. And sure enough Sumi finds the Moon Flakes, but without knowing the contents of what was really in the Moon Flakes, Sumi eats it, excited. But soon realizes that grave mistake as Sumi get's sick and has no more energy to return home. Meanwhile at home, Sumi's owner is looking for them, saying that their lunch is ready, home cook food specially for Sumi. But Sumi never makes it back after the Moon Flakes. This is the first ending, the Bad Ending.

For players to unlock the good ending, players have to guide Sumi back into the levels to find the secrets which are pieces of the Moon Flakes recipe. Each new level now has new dialogue for the midpoint NPCs (i.e. Raven, Willow, and Holo Drone). Each NPC will hint at how to obtain the puzzle. Once the player collects all the pieces, it unlocks the True Ending. Sumi finds all the pieces of the ingredients. Another cat warns Sumi, saying now you know what is truly in these Moon Flakes, will you still eat them? Sumi then reconsiders because now they aren't so sure. As Sumi reconsiders, a thought occurs, a longing thought of home cooked food. But Sumi then remembers the backpack the owner had strapped on and the snacks inside. Sumi shakes it's little nimble body to which fish snacks fall out and Sumi takes one for the trip back home. Traversing back through the city, the swamp, and finally through the mountains to return home just in time for lunch.

Sumi's Journey is a story about curiosity, the comfort of home, and the lesson that not everything that seems good is always worth it — and that sometimes the best things were never far

Getting Started

- **Launching the Game**
 - Open the game in a supported browser (Chrome, Firefox, Opera, etc.). Keyboard is required.
 - The title screen will appear with an animated background. Clouds and birds sweep back and forth on a small arc like path.
 - Click the START button to begin. This button has a pointer over and pointer out effect. Getting larger when pointer hovers over and returns to normal upon hover away.
 - A short opening cut scene plays, then the game begins at Chapter 1.
 - The first playthrough is getting players used to mechanics and get to the end of the three levels to unlock a second ending.
- **Controls**

Key	Action
Left / Right Arrow Keys	Move Sumi left and right
Up Arrow Key	Jump

M	Meow: Interacts any NPC showing an ellipsis (...), or objects. You must be close enough for meow to register..
---	--

- **Lives:**
 - Sumi starts with 3 lives in each chapter for a total of 9 lives across the game, fitting for a cat.
 - Taking damage from any enemy causes Sumi to hiss and get knocked back.
 - Losing all 3 lives in any given chapter triggers a Game Over Screen, the retry button will bring you to restart the same level.
 - Falling into the void also triggers a Game Over Immediately while playing a falling sound.

Chapters & Level Guide

- Sumi's Journey is divided into three chapters. Each introduces the core mechanics, moving, jumping, and navigating platforms. The goal of the first playthrough is to get used to the surroundings, mechanics, and get through all three levels.

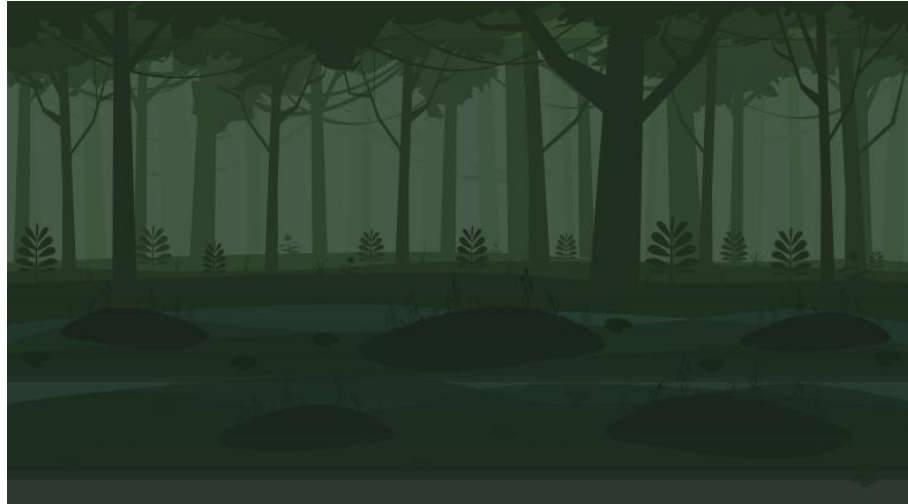

○ Chapter 1: Beyond the Peaks

- A warm and open mountain countryside. The first chapter introduces the core mechanics. Moving, jumping, and navigating platforms. The terrain challenge is learning to navigate the varying platform heights and distance.
- **Enemies: Birds**
 - There are a total of two bird zones in this chapter. When Sumi enters a bird zone, a total of three birds spawn from the right side of the screen and fly straight across at a fixed height. A chirp sound plays the moment each bird spawns, giving you advance warning.
 - Either wait for the birds to pass before moving, or jump over them if the timing is right.
 - Contact with a bird costs 1 life and Sumi get's knocked back.
 - TIP: The screen is wide. There is time between the chirp and the bird reaching you. Don't panic, watch the height and decide whether to jump or wait.
- **NPCs:**

NPC	What They Say
Raven	"Up ahead there should be a frog in a rain coat, make it up the platform and you shall find your way."
Frog in Rain Coat (Checkpoint)	"I heard you're after the Moon Flakes. Find my brother, he resides in the swamps and he has what you need." Interacting with this NPC saves your progress and transitions to Chapter 2 in the first play through.

○ Chapter 2: The Quiet Bog

- A murky, treacherous swamp. The terrain challenge here is timing. Lily pads crumble beneath Sumi after a moment, so the player must keep moving and plan each jump. Stable platforms are scattered throughout to give you a moment to rest.
- **Enemies: Rain Frogs**
 - Rain frogs sit on lily pads and jump up and down in a consistent rhythm. Only movement is vertical.
 - There are a total of two 'croak zones' where the frogs will croak as it jumps. Listen to their rhythm and decide to when to go.
 - The lily pads they land on are stable and won't crumble, giving you a choice of whether to try and time going under and jump off the lily or jump over the frog onto the next platform.
 - Upon colliding with the frog, Sumi loses 1 life and get's knocked back. Potentially falling into the void, so time your jumps carefully.
 - TIP: Watch a frog jump two or three times, the rhythm is consistent.
- NPCs

NPC	What They Say
Willow O'Wisp	Past the frog that sleeps, you'll find a drone. It will guide you past the city gates.
Drone by City House (Checkpoint)	After the Moon Flakes huh? ...I'll help you pass the city gates. Interacting will save your progress and transitions to Chapter 3.

○ **Chapter 3: Concrete & Shadows**

- The big city. Dark, unfamiliar and unlike anything Sumi has seen. The terrain challenge here is navigating moving platforms. They move horizontally back and forth shown by orange beams the exact distance it will travel to. Time your jumps to reach the next moving platform or static platform.
- **Enemies: Security Drones**
 - Drones patrol and move horizontally back and forth and has a light beam showing exactly where it's looking. Watch the platform's movement first before jumping as the drone could be patrolling that area in the moment you jump. The exact path of the drone is shown by an orange beam.
 - Players must guide Sumi to hide behind boxes. If the player is fully hidden the box will turn slightly opaque.
 - Once the drone moves past and clears the way, players must quickly make it past the patrolling zone or to the next box.
 - Upon collision with the light beam, players will get knocked back farther to avoid the drone colliding with the player while moving. The light will also flash red briefly.
 - TIP: watch the orange range markers behind the drone. It shows exactly where it patrols.
- **NPCs**

<u>NPC</u>	<u>What They Say</u>
Holo Drone (Blue Advertisement Screen)	Past the sound of dripping water you will find what you seek.
Moon Flakes (Checkpoint)	Interacting with the Moon Flakes at the end of the chapter triggers the ending. Which ending plays depends on whether Sumi has collected all three ingredient pieces.

Changes After the First Playthrough

- After completing the first playthrough and receiving the Standard Ending, the game changes in several ways that make the second playthrough more meaningful.
- Menu Changes:
 - After the Standard Ending, the main menu updates to show the front gates open, Sumi having left home.
 - Upon pressing the start button for the second run through, the opening scene now adds Sumi's owner preparing a backpack and snacks for the True Ending.
 - A Level button appears on the main menu, allowing players to choose individual chapters to replay.
 - After the True Ending, the main menu shows Sumi walking back through the gates as the owner calls out.
- Level Select
 - Each chapter can be replayed from level select. Once you collect the recipe pieces in a chapter, a gold star appears on that chapter's button. Tracking progress across all three levels.
 - After completing a level in this mode, you return to the main menu rather than continuing to the next chapter.
- In Game Changes:
 - Now when players select a level, two new features are shown in the HUD.
 - Home Icon: This brings the user back to the main screen.
 - Recipe Pieces: To the left of the Lives icons, a new indicator now called Recipe Pieces are shown. It tells the player which pieces have been collected, 1, 2, or 3 or none in which case all three pieces will be opaque.
- Updated NPC Dialogue
 - On replays the mid-level NPCs, Raven (Chapter 1), Willow (Chapter 2), and the Holo Drone (Chapter 3), now have new dialogue. Their updated lines hint at where the secrets are.

<u>NPC</u>	<u>New Hint Dialogue</u>
Raven (Chapter 1)	"I heard these birds love to steal things...they usually hide them in their nest, and are sensitive to sounds"
Willow (Chapter 2)	"The bog reveals its secrets to those who do not run from the shaking ground. Look carefully at what lies ahead, not every lily is the same."
Holo Drone (Chapter 3)	"Something in this area has been slowly winning against the drones. Drip by drip."

Standard Ending V.S Good Ending

- When Sumi reaches the Moon Flakes at the end of chapter 3 in the first playthrough, the game checks how many recipe pieces were collected. There are two possible endings.
- **Standard Ending:**
 - Triggered when Sumi has not collected all three recipe pieces.
 - Sumi eats the Moon Flakes at the end of Level 3, unaware of the contents. Shortly after Sumi gets sick and loses energy, unable to make it back home from the long journey. Meanwhile, back at home, Sumi's owner has prepared home cooked food and is looking for Sumi who cannot return home.
- **Good Ending:**
 - Triggered when Sumi has collected the last piece of the recipe and when Sumi interacts with the checkpoint NPCs, i.e. the NPCs at the end of the levels it will trigger the Good Ending regardless of level as long as three pieces have been collected.
 - Good Ending: Sumi collects all three pieces of the recipe, a cat asks Sumi if they still want to eat the Moon Flakes after knowing it's contents, Sumi second guesses and reminisces home cooked food. Sumi then remembers the owner packed a backpack with snacks for them, shown in the second playthrough cutscene if player presses start again. Sumi then shakes the snacks out of the backpack and takes one for the trip back home. Back through the city, the swamp, then finally the mountains and returns home.

Hidden Recipe Pieces – Unlocking True Ending

- Each chapter contains one hidden recipe piece of the Moon Flakes recipe. At each level it's concealed behind a secret puzzle. These pieces are optional during the first playthrough since the main goal is to get used to the mechanics of each level. Upon completion of the first playthrough, the Bad Ending plays and players will return back to the main scene. A popup message will show: "A new ending awaits! Interactive characters now have new clues, read carefully. Find all 3 hidden pieces of the Moon Flakes recipe to unlock the True Ending!"
- As mentioned in the pop up, there is new dialogue to some of the NPCs and it hints towards how one could obtain the secret recipe pieces in each level.
- The puzzles are designed to reward curiosity and observation. Pay attention to what looks slightly out of place, and listen carefully to your surroundings.

Piece	How to Obtain
Piece 1 – Chapter 1	Near the end of the chapter there is a series of platforms that climb upward, right after you talk to the raven on a sign. On the last step before reaching the exit, there is a ledge down below with a bird in a birds nest. Drop down to the ledge and press M (meow) when close enough to the bird. Sumi will meow and scare off the bird since it's sensitive to loud sounds. The bird flies away and Sumi can now collect the first piece. There will be a path going back left and continue the regular route upward.
Piece 2 – Chapter 2	In the sequence of lilies after the willow, the last lily pad is slightly larger than the rest. Land on it and stay still, do not jump off even as it shakes. All lily pads shake before falling, but this one is special and if players stay long enough it reveals the last piece. The sleeping frog on the right side of the screen will jump off the stump and reveal the second recipe piece. Referring to his brother who had guided the player to the swamp.
Piece 3 – Chapter 3	The Holo Drone NPC hints at how to destroy the drone or defeat it, 'drip by drip'. Listen for the sound of dripping water, when you get close enough there will be water dripping into a jug right over the drone down below. Push the jug and it will fall and break the drone, exposing where the last piece of the recipe is.

Art & Credits

All artwork in Sumi's Journey, including player animations, all animations, platforms, enemies, NPCs, and UI elements are hand-drawn by the developer. Every asset is original and may not be reused without permission.

SUMI'S JOURNEY

User Manual Document | Assignment 3

DLC Overview

Sumi's Journey: Assignment 3 is a direct continuation of the Standard (Bad) Ending from Assignment 2. After eating the Moon Flakes and falling ill, Sumi is taken into the Lumico corporate research facility. This DLC contains three new levels, new morph mechanics, new controls, new multi-step puzzles, and three new endings.

To access the DLC content, complete the first three levels of Assignment 2. After the Standard Ending plays, return to the main menu to which now two new buttons appear. Levels, allows level selection from levels 1-3, and the DLC button which is the gateway to the DLC content for Assignment 3.

Story Continuation

After eating the Moon Flakes, Sumi collapse near the Lumico facility. Workers notice that Sumi reacts unusually to the serum and brings Sumi into the laboratory. Sumi then wakes up inside a cage.

There is something deeper lurking in the confines of the Lumico facility. Sumi soon learns that morphing is possible. Dog, Human, Cat. The mutation will soon reveal that it's unstable, shown in the first ending.

Sumi's goal: escape Lumico, sabotage their cargo shipment, and find a way home. Along the way, three hidden antidote pieces can be collected to determine which ending sumi receives.

New Controls

Arrow keys and M carry over from A2. Two sets of new keys are introduced in the DLC:

Key	Action
F	Pick up or drop an item. Press once to pick up an item, press again to drop it. Sumi can only hold one item at a time.
E	Interacts with items that aren't pickup able, aka environmental items such as panels, terminals, vents, buttons, beds, lockers, and more.
1 / 2 / 3	Switch between morph forms. Cat, Dog, and Human respectively. Switching to any form will instantly drop any held items.

Note: M is still usable in the DLC as extras and flavour to the game world but not required.

The Morph System

The Morph System is the core new mechanic for the DLC. The Moon Flakes serum allows Sumi to transform between three forms, each with unique abilities and limitations. Choosing the right form at the right time is the key to solving every puzzle.

Form	Key	What It Can Do	What It Cannot Do
Cat	1	Highest jump, can crawl through smaller spaces like vents, can carry lighter items like key cards, clippers etc.	Cannot pick up heavy objects and cannot use tools, not recognized by human NPCs.
Dog	2	Sniffs out hidden scent trails to find things like vents, cards.	Cannot pick up heavier objects and cannot use tools, not recognized by human NPCs, cannot go through vents
3	3	Use tools (wrench, insert access cards), carry all items in the game, wear what is in their inventory.	Lowest jump point, cannot fit through vents or sniff out trails.

Important Morph Rules

- You cannot morph while in mid-air. Land first, then switch.
- Switching forms automatically drops whatever item you are holding at the players feet or somewhere nearby that isn't overlapping any other items.
- Forms were available in all levels to begin with.
- When going through any vents, morphing is disabled to prevent breaking and glitching through the games walls.
- Each form sees and says different things about every object in the game. Exploring with all three forms reveals bits of pieces of the story.

Inventory

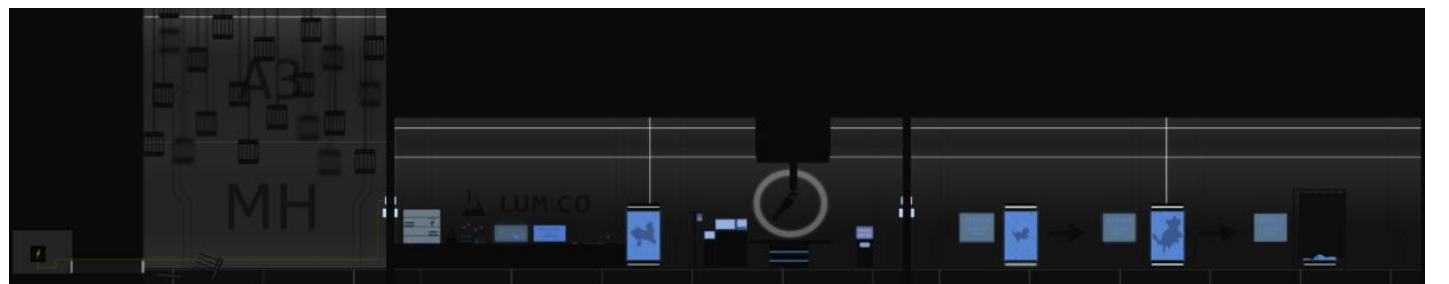

Sumi can hold only one item at a time. The current item will display in the bottom right corner with it's name displayed above the slot.

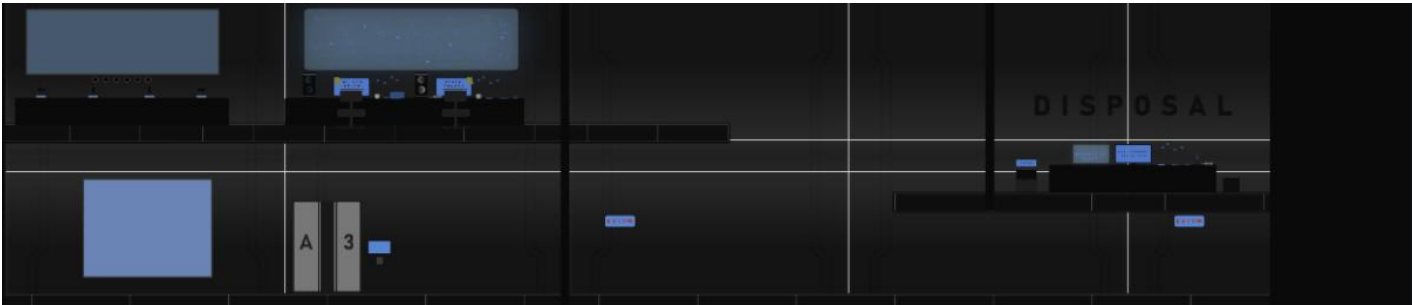

- Press F to pick up an item when close enough and the item is highlighted when overlapping it.
- Press F again to drop the item.
- Switching forms drops the held item automatically, placing it at a nearby safe spot.
- Some items can only be picked up in Human form. Lighter objects can be picked up by the dog/cat. Will display a message if something is too heavy for the current form.
- Items must be in your inventory to use them on interactive objects (e.g. Keycard at a terminal)

Level Guide

Level 4 – Escape Protocol

Sterile, fluorescent- lit lab corridors. Sumi wakes up in a cage. Tense and claustrophobic. Background ambience plays and metal creaking sounds are played while Sumi swings slightly in their cage. This level teaches Cat and Dog form use together.

Puzzles & Tips:

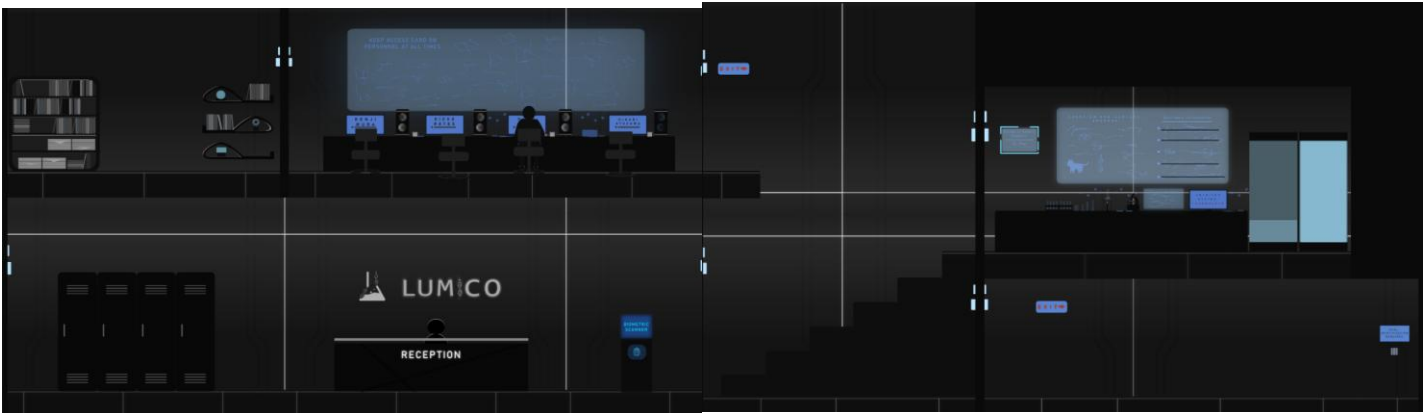

Section	What To Do	Tip
Cage Escape	Swing left and right using the arrow keys. Hit the left wall hard enough to break the cage and drop down.	Keep pressing left and right, back and forth to gain momentum until it hits the left wall.
Wire Room	Press E on the electrical panel to interact with it. Pick up clippers (F) from the room and return to the panel and press E to use it on the electrical panel. The door will now open.	The yellow wire is visibly connected to the door. Follow it.
Lab / Keycard	There will be a access terminal in this section. Upon interaction with it, it'll tell you that it needs something. In the same room there is a keycard on one of the monitors. Grab the keycard and return to the terminal to use it. The door now opens.	If you press E at the terminal without the keycard it will tell you something is missing.
Dog Intro	A cutscene plays. Sumi is frightened and involuntarily becomes a dog. Follow the on-screen prompt to switch between forms.	This is automatic. No action needed.
Scent Trail / Vent	Switch to Dog (2) or stay in dog if you haven't switched, head to the right side to find a scent trail, follow it. A vent cover will appear, press E to reveal a vent to the next section. Switch to cat to crawl through it.	Only dog can find the vent cover. Scent trial disappears if you switch forms.
Garbage Disposal	As a Cat, trying to pick up the garbage will result in a dialogue saying it's too heavy. Switch to Dog (2) and pick it up (F). Carry it to the disposal chute and press E. A cutscene plays. Follow the new scent trail to the right to find a new vent. Enter as a cat.	Dog can smell and carry the garbage. Cat fits through the vent. Use both.
Button sequence	Read the two sticky notes in the control room for a hint. Look at the board, a sequence of arrows is displayed. Press the four directional buttons in that order. Green = correct, Red = wrong.	The indicators tell you the length of the sequence is 6. The sequence: Left, Down, Right, Right, Up, Left. If wrong, it flashes red three times and you can attempt again. Cutscene will display.

Enemies:

- Lab guard. Guards the exit. Upon running into the guard, it knocks the player back and disables movement temporarily.

Level 5 – Lumico

Sleek corporate HQ. Lab and office sections. This is the most complex level since it requires human interactions and backtracking between rooms. Human form is introduced at the beginning.

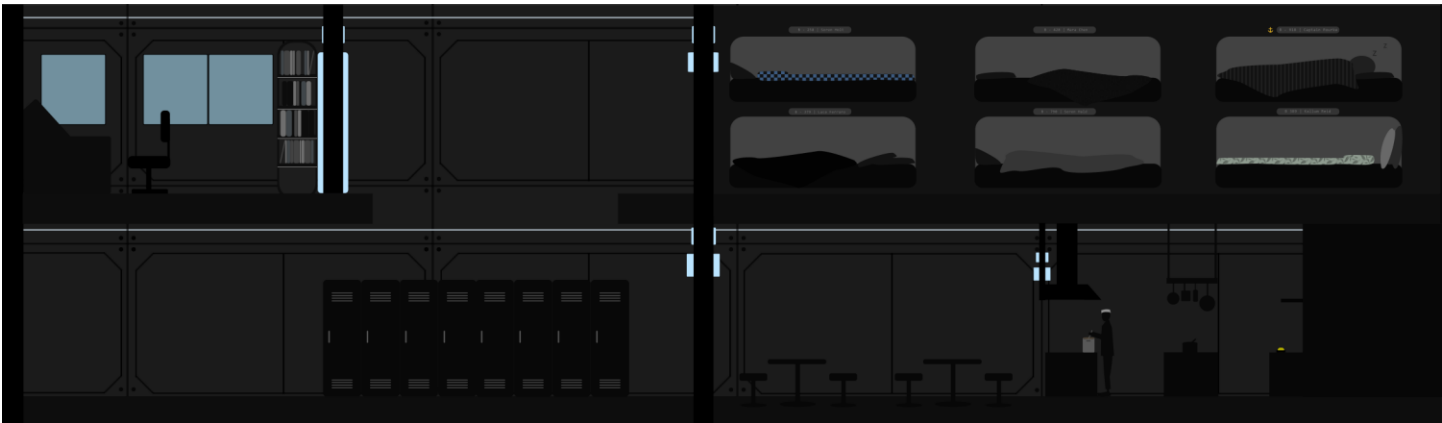

Puzzles & Tips:

Section	What To Do	Tip
Blue Area	Walk right into the blue lit area. A short animation hints at the third form. Sumi reacts with curiosity.	Narrative only. No puzzle. Nudge towards the third form (3)
Bio Scanner / Reception	The scanner at the entrance only accepts Human form. Press E at the scanner as Human (3) to open the door.	Cat/Dog gets complimented. Only Human gets through.
Office / PC Puzzle	As human, interact with the office PC (E). An email interface opens. Find and send the correct file, 'Meeting notes', to Kenji.	Wrong file = 'File size too large!'. No attachment = reminder to attach. Correct = cutscene of Kenji opening the printer room
Printer Room / Kenji	Pick up the crumpled paper Kenji threw (F). Enter the now-unlocked printer room with paper in inventory and press E to jam the printer. Kenji drops a wrench and his ID card.	Watch where Kenji might drop things. Wrench on top of the printer, ID card next to the trash can.
Dual Access Module	Pick up Kenji's ID card and insert it into the dual access module. It only lights up one green light. Tells you it needs another card.	The schedule nearby hints at the next level being on a boat.
Lab / Tank B	Carry the wrench to Tank B on the far right of the lab. Press E to break it. Dr. Kreig rushes over and sets down his ID card to inspect the damage.	Dr. Kreig tells human form the thank is cracking. A strong impact will break it. The wrench is your strong impact.
Door to Level 6	Pick up Dr. Kreig's ID card (F), then insert it into the dual access module in human form. It will open up the D3 door to the next level.	Both cards must be inserted to advance.

No Enemies

Level 6 – The Shipment

A dark industrial port at night. Shipping containers, cranes, and ocean. Sumi is on a Lumico boat. All three forms are required. The goal: sabotage the cargo and escape.

Puzzles & Tips:

Section	What To Do	Tip
Dock & Guards	Navigates over cargo containers and past four guards. Guards have two different things to say. One for each set of guards.	Guards are dialogue only, hints towards uniform in lockers.
Lockers / Chef Hat	Interact with each locker until you find the special one. Pick up the chef hat (F).	One locker looks slightly different from the rest.
Chef / kitchen	Switch to human (3) with the chef hat in inventory. Walk up to the chef and he will let you in and tells you not to ring the bell until the food is ready.	Any other form even with the hat won't be allowed past the chef.
Bell / captain	Ring the bell (E). A cutscene shows the Captain waking up and walks down to the kitchen, effectively unlocking the door.	Any form can ring the bell.
Bunker / Scent trail	Switch to Dog (2) form in the bunker. A scent trail will appear, leading to one specific bed. Press E in dog form on that bed to find the access card.	Other forms search the beds and find nothing. Dog's nose knows.
Control Room	Use the access card in inventory to open the control room door. Then move to the far left and interact with the control panel.	The control panel is the point of no return. Sumi displays this text and tells you the objective. To drop the containers into the ocean.
Crane Mini game	A new scene loads. You are in cat form. Use arrow keys to move Sumi and press E on the buttons (left, right, lower, release) to control the crane. Move each box to the drop zone on either side and release it into the ocean. All 5 boxes must be dropped to trigger the ending.	The crane auto-grabs a box when it makes contact. Use Lower to bring the crane down, then left/right to position, then release to drop.

Enemies:

- Kitchen staff. Guards the kitchen. Upon running into the chef, it knocks the player back and disables movement temporarily.

Hints

In every level, there are hints that you can access in the top right corner. A little circle with a question mark on it. Upon clicking it, a small panel shows up. There are 5 hints per level and guides you through the entire game. The hints range from small nudge to telling you how to proceed.

Level	Hint 1	Hint 2	Hint 3	Hint 4	Hint 5
4	Explore the area carefully. Some items on the floor might be useful	F picks up items, E interacts. There's something on the floor and an electrical box nearby	Use dog form to follow scent trails. Only cat form can fit through vents	The garbage room is too stinky for cat. Dispose of the garbage in dog form, then follow the new scent trail	Find the vent after disposing garbage, go through as cat, then enter the button sequence in with the opposite directions
5	Only one form can use the bio scanner. Look around the office carefully for interactive items	The PC on the upper floor is interactive. Find the right file to send — not all attachments are the right size	The printer room is now unlocked. Pick up the paper you see and bring it to the printer as a human	Kenji left something behind after his outburst. The tank in the lab looks fragile — one good hit should do it	You need two ID cards for the dual scanner at the end of the lab. One comes from Kenji's mess, one from the scientist after breaking the tank with the wrench
6	Parkour through the boxes to get inside. Check every locker — one has something useful inside	The chef won't let just anyone into the kitchen. You need to look the part first	The chef said don't get trigger happy — but the bell is there for a reason. Ring it when you're ready to move on	The bunkers are now open. Switch to dog form up there to sniff out something hidden	Use the access card you found to unlock the control room, then interact with the control panel to trigger the final sequence

Hints after the first play through

Level	Hint 1	Hint 2	Hint 3	Hint 4	Hint 5
4	You've already cracked the code once... what if you thought about it differently?	Every direction has an opposite. What happens if you reverse your thinking entirely?	Try the opposite of the directions given on the board. Start left to right again.	Right, Up, Left, Left, Down, Right	
5	The scientist's research notes list some interesting components...	Where does the item listed usually show up. Can it be heard?	Listen carefully near the lab tanks. Cat form might be small enough to investigate the vents on the right side	In cat form go right in the lab all the way to the wall and there will be a vent.	Bring the to mouse scientist.
6	The bookshelf in the control room area is hiding something. Try interacting with it as a human	Read the safe instructions carefully. The bunker nameplates hold the answer	First Impressions only- First character/number, letters and then numbers- code has all the letters and then all the numbers	Start low- bottom first, always left to right- read from left to right, end at the anchor- last digit is from the captain's bunk.	LSK249

Hidden Antidote Pieces

There is one antidote piece hidden in each DLC level. They are harder to find than A2's recipe pieces and require deliberate use of your morph forms. The hint system (hint button in the HUD) will guide you if you get stuck. Hint escalates from subtle nudges to explicit directions starting from the top to bottom.

Piece	Level	How To Find It
Antidote 1	Level 4	At the button sequence panel, enter the mirrored version of the main sequence. The original sequence is L, D, R, R, U, L. The secret sequence is R, U, L, L, D, R. Every direction flipped. The sequence will then flash green three times then a hidden compartment opens and the antidote appears. You must complete the garbage disposal puzzle first before the panel becomes accessible.
Antidote 2	Level 5	In the lab, read the scientist's notes. One ingredient is legible: 'mouse'. Listen carefully near Tank B for a faint squeaking. As cat (1), walk all the way to the right wall in the lab and a vent will appear for the cat to go through. Enter the far-right vent and climb up into the L-shaped upper section. The squeak grows louder and the mouse appears. Find the mouse and pick it up (F). Bring it to Dr. Kreig. The mouse will then jump on him and that causes him to panic and drops the antidote.
Antidote 3	Level 6	In the control room, move the bookshelf as Human (3) to reveal a safe. There are 6 empty slots and a riddle on the safe that reads: 'First impressions only, Letters and then numbers. Start low, always left to right. End at the anchor'. Go to the bunker, where the anchor is the only colorful thing in the room. Read the first letter (first impressions only, letters and then numbers), start at the bottom left bunk (start low, always left to right), the last digit is on the captain's bunk name plates (end at the anchor). The code is: LSK249.

Endings

Once all five cargo boxes are dropped into the ocean, the ending triggers based on how many antidote pieces you collected across all three DLC levels.

Ending	Condition	What Happens
Bad Ending	0 or 1 antidote pieces	Sumi escapes but the serum accelerates. The transformations become uncontrollable. Sumi arrives near home but cannot approach due to what Sumi could transform into and the dangers of it. The owner waits at the gate, and a missing poster of Sumi is seen in the end. A replay hook appears encouraging another run.
Mid Ending	2 antidote pieces	Sumi makes it home but can't fully control the morphing. Some days cat, some days something in between. The ending hints that Sumi can only stay for so long.
Good / True Ending	All 3 antidote pieces	Sumi takes all three antidotes and is now fully cured. Sumi gets off the boat and finally returns home. Showing Sumi and the owner together at the end and Sumi stays this time, for good.

The Mid and Good Endings can be triggered at the end of any DLC level after the first playthrough once enough pieces are collected. You don't have to replay all three levels if you only need one more piece

Changes After First DLC Playthrough

- A popup appears after the Bad Ending explaining antidote collection and granting access to individual DLC level select.
- The main menu also changes and shows a new background.
- An antidote piece counter appears in the HUD from the start of all subsequent playthroughs.
- Hints also change from guiding the level to guiding you towards the secrets.
- A Lumico logo stamp appears on the levels in level select where the antidote has already been collected.
